

Ancient Greece explorer kit

To be used in the Greek gallery on the first floor at the Great North Museum: Hancock

There are four activities in the kit designed to be used by small groups in the gallery. The map activity does require a lot of floor space so I would suggest using the stair well or Natural Northumbria.

Literacy cubes

Roll a cube and when it lands follow the instructions .

Themes include ownership, materials and mythological creatures.

Map reading

Unfold the map and place the images of the different ancient sites and important historical figures in the right places.

Become the archaeologist

One of the artefacts from the gallery has been dropped. Can you put all the pieces back together?

Creating a timeline

Can you find all 15 objects and match up the right date when they were made? Once you have done all of them can you put them in a chronological timeline?
